COVID-19 Prevention, Mitigation, and Response Procedures

August 10, 2020

Dear Parent/Guardian,

As we plan for returning to school at Brady ISD, we recognize that this will be an unusual school year, but we remain committed to supporting your student's learning, as well as his or her safety.

This document outlines the procedures our campuses will have in place to both help prevent the spread of COVID-19 and to respond if a positive case is identified. We hope this transparency helps you to make a decision about your student's on-campus attendance at Brady ISD.

While it is not possible to eliminate all risk of furthering the spread of COVID-19, the current science suggests there are many steps schools can take to significantly reduce the risks to students, teachers, staff, and their families. The Brady ISD strategy for opening and operating is summarized below. A more detailed plan can be found on our district website at <http://www.bradyisd.org/covid-19>.

Prevention

To help prevent COVID-positive individuals from entering our campuses, your student's school will have the following COVID-19 symptom screening procedures in place:

- All staff will be required to self-screen daily.
- All essential visitors will be required to screen upon arrival.
- Parents are asked to proactively identify when their student exhibits COVID-19 symptoms or has been exposed and to keep them home.
- The student screening procedure is detailed in the Health Self-Screening section of the online plan.

If a parent indicates that a student is demonstrating COVID-19 symptoms, the school will retain that information until the student meets the criteria for return to school.

Criteria for Return to School

Conditions for return to school after an individual shows symptoms or gets a positive test result:

Either:

- 24 hours with no fever; and
- Symptoms improved; and
- Fourteen days have passed since symptoms first appeared

{CONTINUED ON NEXT PAGE}

Or:

- An acute infection test at an approved testing location (<https://tdem.texas.gov/covid-19/>) that comes back negative for COVID-19

Or:

- A doctor's note indicating an alternate diagnosis

Mitigation

Our district will be taking numerous precautions across each campus, as outlined in our plan. They include the following to mitigate the spread of COVID-19.

- ***Masks are currently not required, since McCulloch County is currently exempt from the Governor's Executive Order GA-29 for having less than 20 active cases of COVID County wide. However, BISD highly encourages all student and school personnel to wear masks.***
- Bus drivers will be trained in COVID – 19 safety protocols
- All bus drivers will wear a mask
- Hand sanitizer will be provided on all buses and is to be used by all students when boarding and exiting the bus
- Disinfectants will be used for deep cleaning.
- Tissues and hand sanitizer are readily available throughout the district.
- Teachers have immediate access to cleaning products.

Response

In the event of a COVID-positive case on campus, the campus will take the following steps:

- All BISD teachers, staff, and families will be notified via SchoolMessenger. Details of the notification are included in the plan.
- The local health department will be notified.
- All areas that are heavily used by the individual with the lab-confirmed case will be closed off until disinfected.

We hope that this information gives you confidence in the processes to help stop the spread of COVID-19 on our campuses. If you have any questions or concerns, please reach out to us at parentquestions@bradyisd.org or visit our website at <http://www.bradyisd.org>. While this will be a challenging year, we believe it can also be a great one, and we look forward to supporting our students in their learning journey.

Sincerely,

Hector Martinez, Ed.D. Superintendent of Schools
